# Accessing Student SBA Interim Assessment Results

After administering an IAB or ICA, teachers can review and analyze their students' assessment results. Teachers can get overview information on how their classes did as a whole and they can look how each student did individually (you can even see each question and how each student answered it).
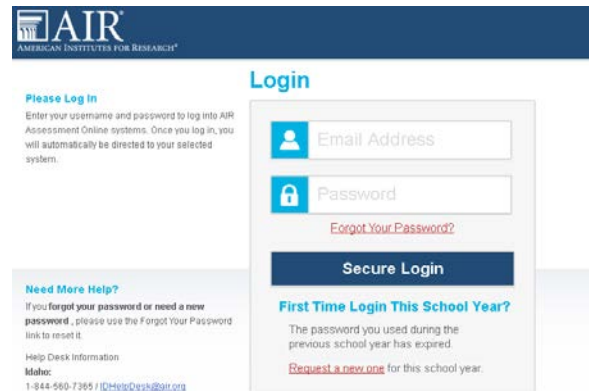

1. Login to WCAP
2. Click Test Administrators

3. Click AIR Ways Reporting

4. Use your district provided Login information

5. Select a Role and Click Continue
   (everyone's options are a little different)

6. You will see something like this... as you administer more Interims, your
options will become more diverse. There are Print and Save options, too.

Student Names and Student IDs

Listed Here...

7. Click on a specific assessment or specific student name to view
detailed class and individual student results

8. View detailed specifics about performance on each question of the assessment
Click either Performance by Roster
or Performance by Student
- Which 5 items did students perform best?
- Which 5 items did students perform worst?
- Look at each individual item's results.

Click **+** & **−** signs to open and close options

9. Analyzing the data will help teachers find the targets, specific content, and
specific item varieties students struggle with. Then, an emphasis can be
put on these during future lessons, activities, and by intervention specialists.
